

Welcome to the FreshRevolution!™

Using Your VacuWare® FreshJarLids™ Kit

The FreshJarLid is an innovative addition to the concept of vacuum sealing. The FreshJarLid allows you to transform nearly any jar into a vacuum sealing container! Remember when you opened that jar of sauce for the first time and heard the “pop” that told you the contents were fresh? Experience that same freshness time and time again with our tell-tale “whoosh”!

Your FreshJarLids Kit includes:

- (1) FreshPump
- (5) FreshJarLids

Grocery store freshness every time you use your FreshJarLids!

How To Seal Your FreshJarLids:

Place FreshJarLid on jar.

Fit the green ring of your FreshPump over the green button on the FreshJarLid.

Holding the base of the FreshPump in one hand, use other hand to pull handle up and push down, maintaining connection between pump ring and green button at all times.

HINT: Pushing down on the base of the pump while sealing will ensure the proper connection between the pump and green button.

Continue pulling and pushing until tension is felt in the handle.

Depending on the size of the jar and its contents, the number of repetitions may vary to achieve a proper seal.

To Release Seal

Press and hold the green button on your FreshJarLid until the “whoosh” sound (air rushing back into the jar) stops. Remove desired content from jar.

To Reseal

Follow Sealing instructions 1-4.

Convert Your Kitchen to VacuWare...
